400 Series Engines

Course Code: MP400

Duration: 1 Day

Course Overview:

This course will give service personnel knowledge on the 400 Series Engine and is mainly an engine teardown course to give an insight into the mechanical aspects of the engine.

Content:

This course will focus on the key components of the engine which includes both classroom lectures and practical hands-on training.

The main areas covered on the course are as follows:

- Engine Introduction
- Fuel System function and operation
- Engine strip down and re build
- Service and Maintenance

Additional Course Details:

A Marapco Training manual will be provided, each successful candidate will receive a certificate of attendance.
