Deepsea Control Systems

Course Code: MPDSE

Duration: 1 Day

Course Overview:

This course is suited for personnel who use DSE6110 and 7320 panels frequently and may have to fit extra options that are non-standard. An in-depth knowledge and understanding of the Digital Inputs, Analogue Inputs, auxiliary outputs, AC and DC Connections will be gained. This course is recommended for anybody who has these controller types fitted to units in their fleet or under service contract.

Content:

This course includes both classroom lectures and practical hands-on training, which will help the trainee to understand and be confident in the control, operation and set-up on Analogue control systems.

The main areas covered on the course are as follows:

- Control System differences
- Alarm/Shutdown settings
- Panel Wiring Diagrams
- Remote Annunciation
- Fault finding Exercises
- DSE Software

Additional Course Details:

A Marapco Training manual will be provided, each successful candidate will receive a certificate of attendance.
