EST Software

Course Code: MPEST

Duration: ½ Day

Course Overview:

This course is suited for service personnel who use this software for fault finding and diagnosing engine faults. An in-depth knowledge and understanding of programming and set-up will be gained from this course and recommended for anybody who has units in their fleet or under service contract fitted with the ADEM 3, ADEM 4 or ADEM 5.

Content:

This course includes both classroom lectures and practical hands-on training, which will help the trainee to understand and be confident when using the software to diagnose faults or re-flash ECM's.

The main areas covered on the course are as follows:

- Software Overview
- Configuration settings
- Changing ECM Configuration Settings
- ECM Re-Flashing
- External Connections
- Data Recording
- Fault Diagnosis

Additional Course Details:

A Marapco Training manual will be provided, each successful candidate will receive a certificate of attendance.
